Kubernetes: from zero to hero

Kubernetes has now become the de facto standard for deploying containerized applications at scale in private, public and hybrid cloud environments. During this session, we will introduce its main concepts and explain them, step by step, by practical examples. The talk will guide developers to learn all the best practices to perform a production-ready deployment for a Java Spring Boot based microservice and a MySQL database.

Fabio Sforza, DevOps Engineer @ Relatech S.p.a.

I work as DevOps Engineer in Relatech, in Naples. I take care of managing the entire CI/CD pipeline of Java microservices. I am a container enthusiast and, for now, I love my job! I'm a couch sportsman, I'm also a wasted talent in baking
